

Meredith Capital Improvements (CIP) Advisory Committee

Date: Wednesday, September 10, 2025

Time: 4:00 PM

Place: Town Hall Annex Conference Room, 5 Highland Street, Meredith, NH

AGENDA

1. Call to Order/ Introductions
2. Review & Consideration of Meeting Minutes – 04/30/2025
3. Administrative Services
 - a. Review Expendable Trust Funds
 - b. Review Long Term Debt
4. Layout and Orientation to CIP Information Packet
5. Project Updates
6. Other Business
 - o Future Meeting Schedule
7. Adjourn

Town of Meredith
Capital Improvement Program
2025-2032

Year	Long Term Debt			Expendable Trust Fund	Total	Available Capacity

Town of Meredith - Capital Improvement Worksheet

Program:	PARCEL MAPPING						Picture(s)				
Department:	ASSESSING						Insert Picture Here				
Submitted by:	J. Commerford		Date:	8/18/25							
Priority:	Untouchable		High		Low						
	Committed		Medium	On the Radar							
Priority:											
Current Tax Maps were digitized in the late 1990's and parcels were "stretched" to make them fit . An overlay of current mapping shows buildings going through property lines and on the wrong properties. This re-mapping would be all new maps based on new aerial photography as well as researching all deeds and plans from town files as well as the Registry of Deeds. This process would take 3 years to complete.											
Justification (improving current town programs or operations, life safety/health, etc): New Maps would provide a highly accurate spatial framework upon which future town data can be built. It will also provide a resource for the determination of a fair and equitable distribution of the tax burden. It will also provide a platform of spatial mapping that can be used by other departments, such as Public Works, Fire, Police, Water/Sewer and Community Development. It is important to have a highly accurate mapping system as the town continues to grow.											
Impact of Cancelled or Delayed: Delaying implementation will continue to keep the mapping system inefficient.

Building Name:	Town Hall										
Address:	41 Main St										
Submitted by:	Tyler Manville		Date:	8/21/25							
Description:											
Brick construction office building housing 11+ employees with public space for vehicle registration, bill payment, etc. Heat: Forced hot water system running on 2 oil-fired Energy Kinetics System 2000 boilers AC: Window AC units Roof: Membrane (at end of life expectancy) Alarm system: Burglary and Fire											
Building Information:											
Year Built	1915	Sq Footage	8,403	Utility service	Town Water/Sewer						
Last Reno		Electric Service		Other							
Upgrades Needed: (improving current town programs or operations, life safety/health, etc):											
Installation of heat pump heat/AC systems (mini-splits): \$70,000 Roof replacement: \$50,000 Carpet removal/replacement: \$30,000 Window replacement: \$75,000 Electrical upgrades: \$20,000 Total estimated improvements cost: \$245,000											
Impact if Cancelled or Delayed:											
Roof is currently beyond the end of it's 20 year lifespan. More and more leaks are popping up and could potentially lead to mold and structural issues. Window replacement and installation of mini-split heat pump systems would greatly increase building heating/cooling efficiency and occupant comfort.

Submitted by:	Tyler Manville	Date:	8/21/25		
Description:					
Former police station transferred to DPW and used for office space as well as sign shop and Buildings and Grounds department shop area. HVAC: 2 rooftop air handling units, AC and propane fired forced air heat Roof: Metal roof installed in 2021 Siding: T1-11 siding (approaching end of lifespan)					
Building Information:					
Year Built	1985	Sq Footage	3,832	Utility service	Town Water/Sewer
Last Reno		Electric Service		Other	
Upgrades Needed: (improving current town programs or operations, life safety/health, etc):					
Siding replacement: \$50,000 Rooftop air handler replacement: \$60,000					
Impact if Cancelled or Delayed:					
Siding needs to be replaced and flashed properly in order to prevent rotting. We have been advised by our HVAC contractor that the rooftop air handlers are beyond the end of their life expectancy. This is a big job that would require a crane to lift and remove old air handlers and replace with new units.

Description:											
Public waterfront park with large grass area, benches, drinking fountain, "Welcome to Meredith" sign, bandstand, and footbridge. Many locals and visitors enjoy spending time in the park and enjoying the lake views. There are many public events held here throughout the summer and in the winter the park is lit up with Christmas lights throughout the trees.											
Building Information:											
Year Built		Sq Footage		Utility service	Irrigation System						
Last Reno		Electric Service		Other							
Upgrades Needed: (improving current town programs or operations, life safety/health, etc):											
Stone waterfront rebuild: \$ Bollard Light replacement with streetlamps: \$ Electrical upgrades: \$											
Impact if Cancelled or Delayed:											
The stone wall waterfront is aging and is crumbling into the lake in many spots due to years of erosion and ice damage. This creates sinkholes and uneven ground along the water's edge. The electricity in the park is another area of concern. There are many outlets throughout the park that do not work due to broken conduit under the ground. The bollard lights are falling apart due to vandalism and will need to be replaced and potentially upgraded to streetlamps to spread light better and add to the aesthetics of the park.

Public docks and boat ramp with boardwalk, parking lot, public benches and trash receptacles.				
Building Information:				
Year Built		Sq Footage		Utility service
Last Reno		Electric Service		Other
Upgrades Needed: (improving current town programs or operations, life safety/health, etc):				
Docks repair: \$ Boardwalk infrastructure repair: \$				
Impact if Cancelled or Delayed:				
The town docks and boardwalk infrastructure are aging and in need of major repairs. Due to years of erosion and ice damage the docks are in rough shape in many areas. Many of the pilings have shifted and sank into the bottom of the lake causing uneven dock surfaces. The boardwalk has many areas of rotting wood and undermining beneath. The Buildings and Grounds Department makes countless surface level repairs throughout the year, but major renovation is needed in order to keep the town docks up and running in the future.

Gazebo renovation: \$25,000 Boardwalk lighting upgrade: \$10,000										
Impact if Cancelled or Delayed:										
The gazebo is aging and the natural wood construction is beginning to rot in many areas. The gazebo will need a major renovation at some point in the near future. The boardwalk lighting is in need of a major upgrade due to many broken light fixtures as well as broken wires under the boardwalk.

Facility Name:	Lovejoy Public Landing										
Address:	31 Lovejoy Sands Rd										
Submitted by:	Tyler Manville	Date:	8/21/25								
Description: Public boat launch, dock, and parking area. Primarily used for island property access.											
Information:											
Year Built		Sq Footage		Utility service							
Last Reno		Electric Service		Other							
Upgrades Needed: (improving current town programs or operations, life safety/health, etc):											
Major dock infrastructure repair/rebuild: \$											
Impact if Cancelled or Delayed:											
The concrete dock at Lovejoy Public Landing is in need of major repairs or a total rebuild. Over time, the stones beneath the dock have been slowly shifting and sinking into the lake. This has created uneven walking surfaces on the dock. This dock is also in need of additional docking space during the busy summer months.

Town of Meredith - Capital Improvement Worksheet

Project Name:	Leavitt Beach				
Address:	50 Leavitt Park Rd.				
Submitted by:	Vint Choiniere	Date:	8/16/25		
Priority:	Untouchable		High		Low
	Committed		Medium	x	On the Radar
Project Description:	Replace Bath House and Renovation of the Site				
Leavitt Beach is a beautiful beach that serves Meredith families very well in that the water is very shallow and is safe for young children, and the shaded picnic areas provide a great place for families to spend the entire day. The Bath House is in very poor condition and is in need of replacement. It was donated to the town in 1991 and was set on concrete blocks in the corners, which has caused the building to sag and twist over the years. The site has poor drainage which has caused erosion issues. The parking lot was constructed on two levels and is inefficient, and experiences erosion. The septic system was installed in 1992. The restrooms were recently renovated and					
Building Information:					
Year Built	1,945	Sq Footage	28 Acres	Utility service	
Last Reno	annual maint	Electric Service		Other	
Justification (improving current town programs or operations, life safety/health, etc):					
The Parks and Recreation 15 Year Master Plan recommends hiring a professional design team to assist with developing a master plan to include replacing the Bath House, install a playground and picnic pavillion, improve drainage, parking, and evaluate and replace the septic system if necessary.					
Impact of Cancelled or Delayed:					
The Bath House has little remaining value. Although the site is considered a seasonal facility the recommended improvements are worthy of consideration due to the environmental impacts to Lake Winnepesaukee. The recommended improvements

Project No. 3067

August 18, 2025

Mr. Michael Faller
Director of Public Works
Town of Meredith
41 Main Street
Meredith, NH 03253

Re: Town Road Priority List
Town Wide Road Evaluation
Meredith, NH

Dear Mr. Faller,

Attached for your use is the recommended Priority List providing a 5 year (short term) repair schedule for the Town's road network with costs summarized to provide an annual budget. This list has been updated following discussions at our August 5th work session. The information below is provided as a brief description as to how this priority list was identified. A complete summary report will follow under separate cover.

ASSESSMENT

In order to prepare this priority list, UE assessed the road surface conditions for all roads owned by the Town (Class V roads) in the summer of 2024. These assessments were completed in person using windshield survey methods. This boots on the ground method provides opportunity for engineering judgement to be used and is the starting point in identifying recommended repair strategies for capital projects and routine maintenance for a given road. Information collected during the windshield survey includes (but is not limited to) length and width to help quantify each road and ratings of various surface defects to be able to determine the pavement conditions index (PCI) for each road. PCI is used as a starting point to classify each roadway into maintenance categories (routine, preventative and reconstruction). Some engineering judgement is then applied to better categorize each road based on recommended repairs assigned. Budgets are then developed using the recommended repairs assigned within each category and a prioritized schedule is developed. During the process the Town is consulted for input on repair strategies, overall priorities, and budget.

We note that some assessment info was updated in Spring of 2025 to account for any significant maintenance completed (i.e. pavement overlays) since the time the field work was conducted.

REPAIR STRATEGIES

As noted above, UE worked with the Town to develop a list of repair strategies best suited for their road network. Repair strategies vary depending on the severity of the road's condition and surface type. Each road section was reviewed individually and repair strategies were applied. In some instances, an assumed quantity for select repairs or improvements was included based on observations during the assessment process (i.e. installation of closed drainage or underdrain systems). By applying the unit price to the quantity of each strategy selected, a recommended

budget was determined for each road segment. We note that bid results from recent UE projects and recent pricing info from the Town were used in updating the unit prices.

REPAIR SCHEDULE

The prioritized schedule of recommended repairs was developed by using a weighted ranking system which considers the PCI, importance, traffic volumes, and drainage conditions for each road section. Even though the multiple factors are used in the weighted ranking, roads with a lower overall PCI and poor drainage scores are generally given priority over roads with an overall higher PCI. Where roads were split into multiple sections during the assessment process a road's priority listing was based on the section with the lowest ratings. The intent is to complete repairs on the entire road at once so that once complete, the entire road will have a consistent condition which can simplify maintenance scheduling long term. Therefore, the total budget shown for the road includes the entire road length with the recommended repair strategies selected to best fit the condition of each section.

There are instances where longer roads or roads that involve a greater scope of work consume the majority of the allocated planned budget for a given year. An example of this is Upper New Hampton Road in 2027. When this occurs, shorter less expensive roads are used to help fill in the prioritized schedule so that the entire recommended yearly budget is utilized. These shorter roads are also selected by trying to prioritize around the lowest PCI value. This yearly plan provides an annual budget.

RECOMMENDED BUDGET

As shown on the attached prioritized repair schedule, the recommended budget for roadway maintenance ranges between \$1,500,000 and \$1,600,000 per year. We acknowledge that an increase to the yearly budget may have a significant impact to the Town's tax rate. With this in mind, other communities have completed step increases to slowly increase their budgets from the current level to the recommended levels to help mitigate tax rate impacts.

Lastly, we note that this budget represents costs if the Town were to solicit bids and hire a contractor to perform the recommended work. Based on our discussions with the Town we acknowledge the Town self performs roadway maintenance and improvements to the greatest extent possible. This can result in cost savings from the recommended budget.

Please call with any questions upon review of the information provided

Very truly yours,
UNDERWOOD ENGINEERS, INC.

Project Name:	Sirles Road Bridge						Picture(s)					
Department:	Public Works Highway											
Submitted by:	Craig Hale	Date:	8/12/25									
Priority:	Untouchable		High		Low							
	Committed		Medium	x	On the Radar							
Project Description:												
This bridge is located under a very low traveled gravel road. It has undermining from moving water under the sidewalls supporting the decking. One sidewall is cement, while the other is lined with stones. The decking is a steel frame support, with wood boarding for the deck. The upper side of the deck has gravel on top of it to match the road surface. A good amount of water runs through here in high rains and seasonable runoff.												
Drainage Information:												
age		material	cement/stone/wood	pipe length	20'							
pipe condition	poor	road type	gravel	pipe size								
Justification (improving current town programs or operations, life safety/health, etc):												
This bridge could become a hazard for travel. If it was to be closed it would have no impact to the residents with properties off the road, as the road is only 504' in length and has 2 entrances at each end coming off of Meredith Center rd.												
Impact of Cancelled or Delayed:												
none

Vehicle/ Equipment Name	14E1 - Engine 1						Picture(s)				
Department:											
Submitted by:	Chief Jones		Date:	8/21/25							
Priority:	Untouchable		High	X	Low						
	Committed		Medium	On the Radar							
Vehicle/Equipment Description:											
14E1 is a Pierce Dash Pumper, 6-man custom cab, carrying 750 gallons of water and a 1250 pump. Its initial use was a rescue pumper, equipped with firefighting tools, equipment and hydraulics for extrication purposes. It was used roughly 85 to 90% of the calls 365 days a years exposing it to serve conditions at times. Body work has been done and steel rims replaced as well due to rusting. The body has severe rusting conditions and the frame is beginning to deteriorate. Electrical safety features are beginning to fail as well.											
Vehicle/Equipment Information:											
Make	Pierce	Year	2000	Mileage	45527						
Model	Dash	Condition	Fair	Eng. Hrs.	3694						
Justification (improving current town programs or operations, life safety/health, etc):											
14E1 is in dire need of replacing due to body fatigue, (rusting conditions) potentially imposing safety conditions to the crew responding. Roughly 2 yrs. ago, a inner steal rim let go due to rusting and blowing the tire during an emergency response. Luckily the truck was making a turn at an intersection at a slow rate of speed, the outcome could of been alot worse.											
Impact of Cancelled or Delayed:											
In the months to come, Engine 1 may be placed out of service due to it's condition. This will decrease the response capability to the Meredith Citizens and potentially effect our current ISO rating as well.

Vehicle/Equipment Name 14E4 Engine/Tanker						Picture(s) 					
Department:											
Submitted by:		Chief Jones		Date:		8/21/25					
Priority:		Untouchable		High		Low					
		Committed		Medium		On the Radar	X				
Vehicle/Equipment Description:											
14E4 replaced both a 1983 Eng and 1985 Tanker as a combination Pumper/Tanker. \$385,000 was received through Fire Act Grant to put towards the purchase. It is a Pierce Arrow XT 6 man custom cab with 2500 gals of water with quick dumps, portable tank, a 1750 gpm pump with class a foam capability.											
Vehicle/Equipment Information:											
Make	Pierce	Year	2016	Mileage	8936						
Model	Arrow XT	Condition	Good	Eng. Hrs.	787						
Justification (improving current town programs or operations, life safety/health, etc):											
14E4 reduced the fleet by one engine, it also improved water supply in rural areas with it portable tank and quick dump ability from the rear and both sides improving firefighter safety during water shuttle operations.											
Impact of Cancelled or Delayed:											
14E4 supports rural water supply, especially early back up in rural areas with out hydrants. If truck was out of service it is a major set make for water supply. Apparatus scheduled for replacement in 2041

14B1 Fire Boat											
Department:											
Submitted by:		Date:									
Chief Jones		8/21/25									
Priority:		Untouchable	High	X	Low						
		Committed	Medium	On the Radar							
Vehicle/Equipment Description:											
14B1 is currently a 1984 26 ft. fiberglass Sisu with (2) 2020 Yamaha 250 hp. Outboard Motors. (Lobster Boat Style) It is equiped with two pumps, roughly 700 to 740 gpm capacity. Has a deck mounted monitor, hand lines, forestry tools basic EMS equipment, booms & pads, other lose equipment.											
Vehicle/Equipment Information:											
Make	Sisu	Year	1984	Mileage							
Model	Lobster	Condition	fair to good	Other							
Justification (improving current town programs or operations, life safety/health, etc):											
Current 14B1 does not meet the departments current needs. High percentage of calls are to the islands for EMS Patient Transport. With no bench or seating arrangements for patients or members to safely be positioned. If patient care is being administered, the patient is on the floor with water lapping in from the stern, and around the patient. Recent water rescue, the patient was unable to be defibrillated due to wet floor. Also, pumping capacity is not adequate for necessary fire flows with increased Sq. Ft. of											
Impact of Cancelled or Delayed:											
Safety will continue to be in question for FF's and patients being transported with limited space to adminster care during transport. Possible required fire flows not being meet with current pumping capacity. Also, with recent motor replacement boat

Vehicle/ Equipment Name	Mobile and Portable Radios						Picture(s)				
Department:											
Submitted by:	Chief Jones		Date:	8/21/25							
Priority:	Untouchable		High		Low						
	Committed		Medium		On the Radar	X					
Vehicle/Equipment Description:											
Both mobile and portable radios are manufactured by Motorola. Mobiles are APX 8500 series in every piece of apparatus and used as base stations in each station. Portables are APX6000s with both individual and bank chargers within the stations.											
Vehicle/Equipment Information:											
Make	Motorola	Year	2023/2025	Mileage	N/A						
Model	6000 & APX8	Condition	Good	Other	N/A						
Justification (improving current town programs or operations, life safety/health, etc):											
Radios are necessary equipment used on every incident, responding, arrival size-up and operations of the incident. Every FF's has a portable radio for safety purpose on the fireground.											
Impact of Cancelled or Delayed:											
Pure and simple, ff safety would be highly at risk without proper working communication equipment. Radios are usually good for 12 to 15 years, possible 2040 required purchase.

Vehicle/ Equipment Name	Air-Paks						Picture(s)				
Department:											
Submitted by:	Chief Jones		Date:	8/21/25							
Priority:	Untouchable		High		Low						
	Committed		Medium		On the Radar	X					
Vehicle/Equipment Description:											
Scott X3 Pro SCBA 5500 PSI w/ 30 minute cylinder. Picture does not include mask and spare bottle. All firefighters have there own masks and each air pack is required to have a spare bottle.											
Vehicle/Equipment Information:											
Make	Scott	Year	2023	Mileage	N/A						
Model	X3 Pro	Condition	Excellent	Other							
Justification (improving current town programs or operations, life safety/health, etc):											
Generally air-packs are replaced roughly 15 yrs, two cycles of NFPA Standards. Air-Packs are a firefighters survival tool, allowing them to enter hazardoues atmospheres in emergency situations.											
Impact of Cancelled or Delayed:											
Current SCBA purchased in 2023 should make it 15 years before there become totally worn out. Repairs could become very costly to keep in-service or parts may not be available as well. Target date is 2038, may be before.

Vehicle/ Equipment Name	Turnout Gear (PPE)						Picture(s)				
Department:											
Submitted by:	Chief Jones		Date:	8/21/25							
Priority:	Untouchable	X	High	Low							
	Committed		Medium	On the Radar							
Vehicle/Equipment Description:											
Turnout Gear to include Jacket, Pants w/ suspenders & ladder belt, Hood, Gloves, and Boots.											
Vehicle/Equipment Information:											
Make	Globe	Year	2017	Mileage							
Model		Condition	worn	Other							
Justification (improving current town programs or operations, life safety/health, etc):											
New gear will be PFAS free and meet current NFPA Standard. NFPA standard requires PPE to be replaced after 10 years of manufactured date.											
Impact of Cancelled or Delayed:											
Firefighters will be using non certified and worn Turnout Gear in hazardous environments potentially exposing them to various hazards. Purchases in years 2027 and 2037.

Project Name: Water plant - filters (all)							Picture(s)					
Department: Town of Meredith water and sewer												
Submitted by: Jason B		Date: 8/25/25										
Priority: Untouchable		High		x		Low						
Committed		Medium				On the Radar						
Project Description:												
complete rehab of filter media & valves												
Additional Information:												
Length		Year		1988		Road Impact						
# of connections		Condition		poor/fair		type of connections						
Justification (improving current town programs or operations, life safety/health, etc):												
Current state of filters is past their useful life, allowing filter breakthrough, which will lead to poor water quality												
Impact of Cancelled or Delayed:												
Impact on water quality												
Funding:	Percentage	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7-20	Totals	Annual Estimated Operating Costs
